

Controls and compliance checklist

Does Botium Toys currently have this control in place?

Controls assessment checklist

Yes	No	Control
☐	☒	Least Privilege
☐	☒	Disaster recovery plans
☒	☐	Password policies
☐	☒	Separation of duties
☒	☐	Firewall
☐	☒	Intrusion detection system (IDS)
☐	☒	Backups
☒	☐	Antivirus software
☒	☐	Manual monitoring, maintenance, and intervention for legacy systems
☐	☒	Encryption
☐	☒	Password management system
☒	☐	Locks (offices, storefront, warehouse)
☒	☐	Closed-circuit television (CCTV) surveillance
☒	☐	Fire detection/prevention (fire alarm, sprinkler system, etc.)

Does Botium Toys currently adhere to this compliance best practice?

Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
☐	☒	Only authorized users have access to customers' credit card information.
☐	☒	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
☐	☒	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
☐	☒	Adopt secure password management policies.

General Data Protection Regulation (GDPR)

Yes	No	Best practice
☐	☒	E.U. customers' data is kept private/secured.
☒	☐	There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
☐	☒	Ensure data is properly classified and inventoried.
☒	☐	Enforce privacy policies, procedures, and processes to properly document and maintain data.

System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
☐	☒	User access policies are established.

- | | | |
|-------------------------------------|-------------------------------------|--|
| ☐ | ☒ | Sensitive data (PII/SPII) is confidential/private. |
| ☒ | ☐ | Data integrity ensures the data is consistent, complete, accurate, and has been validated. |
| ☒ | ☐ | Data is available to individuals authorized to access it. |

What Botium Toys needs to focus on right now:

- Secure Customer Data: Immediately encrypt payment info and personal details to comply with global laws and protect customer trust.
- Limit Data Access: Restrict employee access to sensitive files so people only see the data they actually need to do their jobs.
- Fix the Password System: Introduce stronger password requirements and use a password manager to make life easier for the team while keeping accounts secure.
- Build a Safety Net: Set up automated data backups and a disaster recovery plan so a system crash or hack won't shut down the business.
- Boost Network Monitoring: Install an early-warning intrusion detection system to watch out for suspicious network traffic that a firewall might miss.
